

SQL Practice Answers

1) **CREATE DATABASE** store;

NOTE: *(To create table first we must have to write "USE" command.)*

➤ **USE** store;

2) **CREATE TABLE** orderDemo(
id int **PRIMARY KEY**,

product_name varchar(50) **NOT NULL**,

order_date date,

price decimal(10,2) **NOT NULL**,

quantity int);

- 3) **CREATE TABLE** orderDetail **AS SELECT** * from orderDemo;
- 4) **DROP TABLE** orderDemo;
