SQL Practice Questions

1) Write a query to create a database named **"store".**

2) Write a query to create a table in 'store' Database with name **"orderDemo"** which will have 5 columns-

    i.   id (Integer ,Primary key)

    ii.   Product name (String, Not Null)

    iii. Order date (Date)

    iv. Price (Decimal, Not Null)

    v.   Quantity (Integer)

3) Write a query to create a new table named **"orderDetail"** which is the exact copy of **"orderDemo"** Table.

4) Write a query to delete the **"orderDemo"** table.
