

# CREATE orderDetail Table

```
CREATE TABLE orderDetail(  
    id int PRIMARY KEY,  
    product_name varchar(50) NOT NULL,  
    order_date date,  
    price decimal(10,2) NOT NULL,  
    quantity int  
);
```

# SQL Practice Questions

1) Insert one record in “**orderDetail**” table.

## SAMPLE DATA

Id	product_name	order_date	price	quantity
1	Pen	2023-01-01	9.05	3

2) Insert minimum 5 records at once in “**orderDetail**” table. (As per your choice)

3) Insert 2 records only into id, Product name and Price column.
